AN APOLOGY

We apologize to our past and potential customers for not issuing our usual type of catalog. We are economizing this year, so that we may put out a much finer catalog in 1951. All of the varieties, with few exceptions, that were described in our 1949 catalog are included in this price list. The thousands of former customers who have last year's catalog will find it of great service in ordering this year. These catalogs have been exhausted, we regret to say. We are including many new and exciting varieties of great horticultural merit in this price list. They will be described in full next year, but don't miss this opportunity to get a start with them this year. You will notice that a whole new section on that fine perennial, the bearded hardy iris, has been included for the first time.

A PROMISE

Our economizing this year should allow us to produce a much finer catalog in 1951 than we have ever sent out before. We are planning to use many more pictures and color printing for the first time.

A GUARANTEE

We will continue to send our customers absolutely only the finest bulbs available in the world, as we have done in the past. We know that many faithful customers of past years wait for our catalog before ordering for spring planting and you may rest assured that, again this year, we will supply you only those top-notch bulbs which have produced such spectacular results in the past.

New Daffodil Classification

The world has adopted a revised daffodil classification which became effective on Jan. 1, 1950. It was proposed by the Royal Horticultural Society after years of careful study. We have adopted this listing in our catalog this year. For the convenience of our customers, we reproduce this new classification table in greatly abbreviated form. In our 1951 catalog we will print the entire revision.

- Division 2. Large Cupped Narcissus (Including the old Incomparabilis and Giant Leeds types).
- Division 3. Small Cupped Narcissus (Including the Barri and true Leeds types).
- Division 4. Double Narcissus.
- Division 5. Triandrus hybrids.
- Division 6. Cyclamineus hybrids.
- Division 7. Jonquil hybrids.
- Division 8. Tazetta Narcissus (The Poetaz Types).
- Division 9. Poeticus Narcissus.
- Division 10. Species and wild forms and their hybrids.

Daffodils For Connoisseurs and Hybridizers

The daffodils listed on this page are the very last word in the daffodil world. They are the results of many, many years of research and painstaking labor among hybridizers. They are varieties that are very scarce at the present. Their fame will increase with the years as their availability becomes greater. The very few bulbs available of each variety are offered for those who want only the world's finest varieties or for those who wish to go on with this exciting work of creating.
